Infection Fighter Formula

Take internally to treat any infection. Apply topically as you would an antibiotic ointment on cuts, wounds, sores, or skin infections of any kind. Apply over any internal areas of infection such as the chest for lung issues and abdomen for urinary infections, cover with a hot pad to push further into the body.

HERBS

2 parts usnea
2 parts yarrow
1 part red clover
½ part nettle leaf
¼ part lobelia

DIRECTIONS

This formula can be made as a salve, tea, extract or capsules. Lobelia is the "thinking herb" that tells the other herbs what to do and where to go to deliver them to the area of distress and then helps to resolve the issue and cleanse the body.
